

## Paper Options

The weight of the paper used depends on the selection you make for its **size** and **type**.

The table below indicates what any given combination of these two variables conform to.

For example:

- By selecting '**Flyers (8.5" x 11")**' and '**Glossy**', the weight of the paper used will be 80 lb.
- By selecting '**Letter (8.5" x 11")**' and '**Premium Matte**', 80 lb paper (with a matte surface) will be used.
